DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-6, 8, 10-16, 18-21, 23, 25-29, and 31-47 are rejected under 35 U.S.C. 102(e) as being anticipated by Weaver et al. (6,400,335).

Regarding claims 1, 10-16, 18, 25-29, 31-47, Weaver discloses a dynamic load sharing system and method using a cylindrical antenna array comprising: a signal monitor disposed in a signal path of said communication system for monitoring signal attributes of a signal transmitted to each of said multiple sectors (see fig.3, col.3 line 63-col.4, line 17 and its description); a signal processor for processing said monitored signal attributes into a load metric for each of said multiple sectors (see fig.3, element 200, and its description; and a sector forming unit for selectively adjusting sector dimensions of one or more of multiple sectors responsive to a comparison of said load metric for each of said multiple sectors (see fig.3, col.3 line 63-col.4, line 17 and its description).

Regarding claim 2, Weaver further discloses CDMA access decoder (see col.1, line 56col.2, line 9).

Art Unit: 2683

Regarding claims 3-6, 19-21, Weaver further discloses all the subject matters described in claimed 3-6 (see col.1, lines 11-22 and fig.3, col.3 line 63-col.4, line 17 and its description).

Regarding claims 8, 23 Weaver further discloses load metric is normalized to a preset maximum power rating for each of said multiple sectors (see col.4, line 66-col.5, line 12).

Allowable Subject Matter

3. Claims 7, 9, 17, 22, 24, 30, are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
